

Technology is advancing every day and the data we produce amounts to more than 2.5 Billion GB per day. About 42% of all businesses in the EU shut down due to data loss.

Harddrive failure is the most common cause for data loss in 80% of businesses. It can be caused by mechanical, electronic or firmware failures. Many human made virus have damaged millions of PC's and affected data centers. Fire, Natural disasters, radiation, theft etc are the other causes.

Manual Backup of data is unaffordable due to limitations in human resources and lack of time in both small and large businesses alike.

Dewdrive is the clean, simple and fast backup service you will ever need. Unique features of Dewdrive makes it stand out from its competitors. Our Software and servers are programmed for data protection and managing business globally without compromising on speed.

Dewdrive backups all file formats with no size limit. You can continue working on your system with no interruptions while dewdrive carefully backups all your important files.

The bandwidth to be used for backup is very flexible and you can set it from 1kb/s to your maximum available speed. Both upload and download speeds can be modulated from the user friendly setting panel.

## Features

Dewdrive has multiple extra features making it the fastest and most versatile backup service.
